B2-208 Testing of Weight Tolerance-Resistant

【Examination contents】

The flat compression examination was done at examination speed $v=20\text{mm}/\text{min}$ in B2-208, and the withstand load was measured.

※ Number of examination bodies. $n=3$

【test result】

	Load-resistant[kgf/100mm]	
	A direction	B direction
N1	233	232
N2	235	234
N3	237	231
Average	235	232

• The load in the A,B direction-resistant was equal as a result of above.

• The load resistant's were calculated for the various lengths of block from side A.

L寸[inch]	Load-resistant[kgf]
4	237
5	295
6	353
8	471
12	708
18	1060
24	1415
78.7	4670
